**DETAILED ACTION**

1. Claims 1-13 are pending in this Office Action.

***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Drawings***

3. The drawings are objected to under 37 CFR 1.83(a) because they fail to show verbal label of the corresponding reference number as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so

Art Unit: 2654

as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

5. The applicant fails to provide Section headings as required by 37 CFR 1.77 (b). appropriate correction is required.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in

Art Unit: 2654

upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

### ***Claim Objections***

6. Claim 11 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. As per claim 11, the applicant is claimed, "audio system an audio coder as claimed is claim 9 and audio player as claimed in claim 10". Here claim 11 improperly depending on claims 9 and 10

Art Unit: 2654

because the claimed limitation fails to further limit the subject matter of the claims 9 and 10. The claim limitation does not contain particular structure of the audio system with an audio coder or an audio player, so that claim limitation does not relate to the independent claims 9 and 10. Therefore, claim 11 is improper dependent from claim 1.

***Claim Rejections - 35 USC § 112***

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 1-8 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claim 1, preamble is directed to a method of an audio signal, however in the body of the claim the applicant fails to show or particularly point out and distinctly claims the subject matter which applicant regards as invention. Similarly for claim 8, preamble is directed to a method of decoding an audio stream, however, in the body of the claim the decoding is not achieved.

As per claim 11, the applicant is claimed, "audio system an audio coder as claimed is claim 9 and audio player as claimed in claim 10". Here in the claim the applicant does not particularly point out and distinctly claim the subject matter about the audio system, and where the audio coder and audio player will exist in the system, or do the system will execute the audio coding or audio playing.

***Claim Rejections - 35 USC § 101***

9. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-8, 11 and 12 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Independent claim 1 directed to a method of encoding an audio signal. Independent claim 8 directed to a method of decoding an audio stream. Dependent claim 11 directed to an audio system. The above claims do not clearly point out functional interrelationship between the claimed limitations as claimed. The applicant appears to be claiming encoding, decoding and audio system, as claimed in claims 1, 8 and 11. The applicant, however, does not indicate whether an encoding, decoding is executing with the mathematical calculation, nor does he indicate whether the mathematical calculation as claimed in claims 1, 8 and 11 is part of encoding, decoding and audio system.

The calculation as describe in the claims cannot execute the encoding, decoding, and audio system not part of encoding, decoding and audio system as recite in the claims.

The claims therefore, lack practical application.

As per claim 12 is directed to an audio stream. The claim contains limitations of data structure (i.e., non-interactive, descriptive material per se). The applicant appears to be claiming a description of an audio stream as claimed in claim 12. The applicant, however, does not indicate as to whether audio stream perform any activity nor does he indicate whether an audio stream is a part of system as claimed in claim 12.

Art Unit: 2654

An audio stream cannot perform any activity nor an audio model is a part of any system as recite in the claim 12.

The claim therefore, lacks practical application.

***Claim Rejections - 35 USC § 102***

10. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

11. Claims 12 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Friedlander et al. (Detection of transit signals by the Gabor representation).

As per claim 12, Friedlander teaches, "Audio stream comprising:"

"a position of a transient signal component" (Abstract);

"shape parameters describing an shape function which shape function has a substantially exponential initial behavior and substantially logarithmic declining behavior" (see section V. Numerical Examples).

As per claim 13, Friedlander teaches, "storage medium on which an audio stream as claimed in claim 12 has been stored (storage medium is inherent in this case).
